NEARLY MAD WITH ITCHING HUMOR

Began on Limbs. Spread in Bunches All Over Body and Arms. Would Scratch Until Fell Asleep From Exhaustion. Cuticura Soap and Ointment Cured in a Week.

Murtieville, Va.-"I was an intense sufferer from some sort of humor. It began on my limbs and gradually spread in bunches as large as my two hands on my hips and an over any and arms. I first noticed a a 60 stinging itching and uncontrollable desire to scratch As soon as I had done so it would relieve very little and

would leave the flesh very red, and flat looking lumps would appear and I would nearly go mad from the awful itching. would scratch till the blood would appear My clothing irritated the breaking out after it had formed sort of a head. Then I would scratch and a watery fluid would ooze from the bumps. The burning sensation was almost equal to being burned by fire. Nights it seemed worse. I could not sleep half the night. I would sit up till late and even after I retired I could not sleep but would scratch

till I fell asleep from exhaustion. "One day I came across some Cuticura Soap and Ointment. I bathed the places with the Cuticura Soap and after they were dried with a towel I would apply the Cuticura Ointment. I was cured in a week." (Signed) Miss Marion T. Purkins, June 6, 1913. Cuticura Soap 25c, and Cuticura Ointmen 50c. are sold everywhere. Liberal sample of each mailed free, with 32-p. Skin Book. Address post-card "Cuticura. Dept. T. Boston." Men who shave and shampoo with Cu-

"I am very much pleased with the splendid showing made by the two Curtiss motors," he zaid. "They ran thirty hours without a hitch; and developed the speed and power and reliability which we need to make aerial navigation safe and sure."

Lieutenant Porte has been devoting his entire time for most of the last fortnight to supervision of the construction of the craft he will attempt to pilot across the Atlantic, in competition for the \$50,000 prise of the London Daily Mail. The successful testing of the motors marks the near approach of the assembling of the aeroplane and its preliminary trials here.
